Summary

Highly-motivated employee with desire to take on new challenges. Strong worth ethic, adaptability and exceptional interpersonal skills. Adept at working effectively unsupervised and quickly mastering new skills.

Hardworking employee with customer service, multitasking and time management abilities. Devoted to giving every customer a positive and memorable experience.

Organized and motivated employee eager to apply time management and organizational skills in various environments. Seeking entry-level opportunities to expand skills while facilitating company growth.

Talented Software Developer equipped with great coding, debugging and project management abilities. Accomplishes project goals consistently with elegant, scalable code. Works great with team members under Agile and Scrum frameworks.

Professional Summary

- Developed web-based PHP applications for deployment on premium service platforms.
- Integrated backend data services to expand available resources within software.
- Researched, tested and implemented various client feature requests to internal content management systems and content delivery applications.
- Interfaced directly with customers to gather software requirements and design development frameworks.
- Collaborated with backend and client engineers to help build features and solve creative problems.
- Authored progress reports for distribution to product managers, keeping stakeholders apprised of project status.
- Regularly updated knowledge of latest industry trends in web development and related technologies.
- Mentored junior developers on industry best practices and techniques.
- Engaged with application team to implement better processes and communications.

Skills & Abilities

1. Teamwork and Collaboration
2. Agile/Scrum Methodology

Experience

3. Software Best Practices
4. Code and Quality Standards
5. Design Patterns and Principles
6. Data Structures and Algorithms
7. Source and Version Control: Git, Github
8. API Design and Development

Senior PHP Developer, Plus91Labs, Gwalior, India | 2023 – Current

- Provided software application engineering and maintenance for development lifecycle.
- Managed development milestones from initial steps through final delivery.
- Designed and developed forward-thinking systems that meet user needs and improve productivity.
- Designed and developed analytical data structures.
- Designed and implemented scalable applications for data extraction and analysis.
- Built databases and table structures for web applications.
- Estimated work hours and tracked progress using Scrum methodology.
- Worked with back-end developers to design APIs.
- Reviewed code, debugged problems, and corrected issues.
- Developed functional databases, applications and servers to support websites on back-end.
- Analyzed existing software implementations to identify areas requiring improvement.

PHP Laravel Developer, Punjab, Pakistan | 2019 - 2023

- Developed back-end components to connect applications with web services.
- Regularly updated knowledge of latest industry trends in web development and related technologies.
- Configured and deployed existing and future REST APIs, integrating with third-party APIs.
- Integrated disparate systems and supported data migration efforts, maintaining technical integrity and consistency.
- Collaborated with project managers and developers to define parameters and plan detailed specifications with clear project deliverables and timelines.
- Worked with clients and cross-functional teams to design new features and functionality.
- Planned, coded and deployed web-based applications using PHP, MySQL and JavaScript.

Education

BCA

2019 – Veer Narmad South Gujrat University

CGPA – 7.50

Recent Project's

True Sales (SFA) – FMCG Product

- FMCG (Fast Moving Consumer Goods) app development refers to the process of creating a mobile application specifically designed for businesses operating in the FMCG industry. These apps serve as a platform for FMCG companies to connect with their Distributors and Retailers, streamline their operations, and enhance overall user experience.
- Here are some key aspects to consider in FMCG app development:
 1. Beat Creation
 2. Tour Plan Creation
 3. Adding Activities
 4. Reporting and Tracking
 5. Performance Analysis
 6. Integration with Salesforce Systems

2. 

VALUES BEYOND GROWTH

True Sales (Pharma) – Pharma Product

- Pharma MR (Medical Representative) app development involves creating a Tablet application specifically tailored for pharmaceutical companies and their medical representatives. These apps are designed to assist medical representatives in their daily tasks, improve communication with healthcare professionals, and enhance overall efficiency and productivity.
- Here are some key aspects to consider in Pharma MR app development:
 1. Patch Creation
 2. Healthcare Professional Information

3. MTP Creation
4. Setting Targets
5. Offline Access and Synchronization
6. Geolocation and Mapping
7. Remote Training and Resources
8. Call Reporting and Analytics
9. Sample Management
